CAREER SUMMARY

Full-Stack Web & App Developer specializing in integrating AI-driven features into modern web applications. Skilled in scalable architecture, AI Integration, Web Development, OSS and enhancing user experiences.

WORK EXPERIENCE

StepNextGenAI | [Link](#) | AUGUST 2025 – DECEMBER 2025 | Internship

- Building and maintaining web applications that integrate AI-driven features.
- Working with the team to develop front-end interfaces and connect APIs for ml-models into websites.
- Enhancing application performance and scalability using modern web technologies and AI.

Role: **Full-Stack Web Developer**

SKILLS

Frontend: React, Next.js, Angular, Flutter, Tailwind CSS, Daisy UI, Bootstrap, Framer Motion

Backend: Node.js, Express.js, Spring Boot, Django, Flask,

Tools: Git, Postman, VS Code, Netlify, Vite, Canva, Docker, MS Office Suite, Google Workspace, Figma, CapCut

Databases: MongoDB, SQL (MySQL, PostgreSQL), Firebase, Supabase, Prisma

Languages: Python, Typescript, Javascript, Dart, SQL, Java, HTML/CSS

AI Tools: Flowise, n8n (Low Proficiency), Github Copilot, Cursor, Claude, Gemini, OpenAI, Google Stitch

Services: Payment Gateway (EPS, SSLCOMMERZ, Stripe, PortPos), JWT Authentication

Soft Skills: Adaptability & Quick Learning, Knack for Debugging and Problem-Solving.

PROJECTS

NakshiBari | A Powerful Toolkit for small Fashion Businesses. | [Live Site](#) - [Facebook Link](#)

- Built an intelligent AI-powered customer service system
- Implemented advanced caching and optimization
- Architected a full-stack AI-powered SaaS platform

Tech Stack: **React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, Prisma, PostgreSQL, Redis, Docker, OpenAI GPT, Flowise AI, Cloudinary, JWT, AWS, Framer Motion**

IlmSpace [WORK IN PROGRESS] | A Personal Space for Deep Islamic Study. | [Live Site](#) - [GitHub](#)

- Engineered real-time UI state management
- Architected an Islamic digital library platform
- Developed intelligent content organization systems

Tech Stack: **Next.js, TypeScript, Tailwind CSS, NextAuth.js, PostgreSQL, Prisma, Cloudinary, Nodemailer, Vercel, Node.js, JWT, Vite, Framer Motion**

Compass AI | An AI Career Analysis and Guidance app | [Live Site](#) (Currently Paused)

- Created AI-Powered Voice Call Platform with Custom Agents
- Engineered Subscription-Based SaaS with Advanced Monitoring

Tech Stack: **Next.js, tRPC, Drizzle ORM (PostgreSQL/Neon), Better Auth, Stream.IO Chat & Video SDK, Google Gen-AI, OpenAI API, Inngest, Polar subscriptions, Radix UI, React Hook Form, Zod validation, PM2.,**

MarathonOps | A Marathon Event Management app | [Live Site](#) - [GitHub](#)

- Created a smooth and secure experience where only the right users could view or edit information.
- Enhanced The Visual Appeal by adding modern, lightweight animations for key interactions.

Tech Stack: **React, MongoDB, Express.js, Node.js, Tailwind CSS, Daisy UI, Flowbite, React-Router, JWT, Motion**

GardenHub | A platform for gardening enthusiasts & tips | [Live Site](#) - [GitHub](#)

- Added smart sorting and filtering tools that enhanced clarity and efficiency.
- Allowed users to create, update, and manage content effortlessly through a well-designed interface.
- Designed a centralized dashboard, helping users manage their information confidently.

Tech Stack: **React, MongoDB, Express.js, Node.js, Sweetalert2, slick-carousel, Daisy UI, Tailwind CSS**

JobBazarBD Web & App | A Job Marketplace app to hire and get hired | [GitHub](#) (Mobile) | [Github](#) (Web)

- Enabled users to browse and apply to job openings with a system that lets employers post available posts
- Designed an intuitive profile and resume builder, helping users showcase their experience and skills.
- Developed features to create, edit, and delete job posts and user profiles, giving users full control.

Tech Stack: **Flutter, Provider, SpringBoot, Lottie Files, Angular.js, SCSS, HTML, MySQL, Material UI**

CERTIFICATIONS & TRAINING

100 Days with Python - Udemy: 2023 - 2024

- Covered core Python concepts including OOP, file handling, APIs, and automation.
- Built small projects like web scrapers and gained experience with Django and Flask.

Complete MERN Stack Web Development: 2024 - 2025

- Completed full-stack web development training covering MERN Stack.
- Built projects implementing RESTful APIs, front-end interfaces, and database integration.
- Ranked among the top 400 out of 5,000+ students in Batch-11, earning special mentorship in Early Job Placement and SCIC.

[View Certificate](#)

Interests in Technology & Future Goals

1. Deeply interested in Cloud Technologies, particularly **AWS, Azure, and Google Cloud**. with a focus on Serverless Architecture and AI Infrastructure, also interested in **DevOps**.
2. Aspiring to specialize in **LLM-powered applications**, integrating intelligent automation.
3. Exploring low-level computing concepts with a focused interest in reverse engineering and Programming with **Rust, C, Python, Golang** etc.

LANGUAGES

BANGLA - Native Proficiency ENGLISH - Fluent Proficiency
